

Levels and determinants of urban mortality: A FOCUS ON CITIES OF LATIN AMERICA

Philadelphia, PA
Sept. 4, 2019

#HealthInCities

A half-day event hosted by the Drexel Urban Health Collaborative addressing the questions:

What can mortality data from Latin America tell us about **health outcomes and life expectancy in cities?**

What are ways to manage issues with mortality **data quality and completeness?**

How can researchers use mortality data to understand how **urban environments might be influencing** mortality and life expectancy in Latin America?

Experts from Latin America and Drexel will present and discuss **specific aspects of mortality in Latin American cities:**

- **Adult and infant mortality**
- **Road traffic mortality**
- Urban mortality in **México**
- Quality and causes of death in **Colombian** cities
- Trends in adult mortality in small areas in **Brazil**

Invited speakers:

Hiram Beltrán-Sánchez, PhD, MA, MS, Associate Professor, University of California – Los Angeles
Piedad Urdinola, PhD, MA, MA, Associate Professor, National University of Colombia – Bogotá
Bernardo Lanza Queiroz, PhD, MA, Associate Professor, Federal University of Minas Gerais, Brazil
Lina Sofia Palacio Mejía, PhD, MS, Researcher, Professor, National Institute for Public Health, Mexico

WHEN: September 4, 2019, from 8:00am – 12:45pm.

WHERE: Drexel University Dornsife School of Public Health. Nesbitt Hall, 3215 Market Street, Philadelphia

WHO: Students, researchers, civil servants and policy makers, non-profits and community organizations working in public health, urban health, epidemiology, biostatistics, demography, or urban planning.

HOW MUCH: \$15 registration / \$10 student registration. Includes breakfast and mid-morning refreshments.

To register: <https://bit.ly/2LcMdFv>

This event is hosted by the SALURBAL Project. Salud Urbana en América Latina (SALURBAL), Urban Health in Latin America, is a five-year project that studies how urban environments and urban policies impact the health of city residents throughout Latin America. SALURBAL's findings inform policies and interventions to create healthier, more equitable, and more sustainable cities worldwide. SALURBAL is funded by Wellcome Trust, and led by the Drexel Urban Health Collaborative under Principal Investigator Dr. Ana Diez Roux. Questions? Contact salurbal@drexel.edu
