PCW 1 HEALTHY-POLIS: HARNESSING OPPORTUNITIES FOR IMPROVING URBAN HEALTH AND WELLBEING THROUGH ENVIRONMENTAL SUSTAINABILITY

This Workshop has the following objects: i) to identify and discuss innovation and standardisation of epidemiological, exposure and health impact assessment methods based on big data analyses, smart sensors, citizen science, integrated modelling, and system based participatory approaches; ii) to provide a forum for international, multi-disciplinary research collaboration on urban environmental health, health equity and sustainability, leading to one or more multi-centre funding applications; iii) to evaluate and promote environmental interventions, focusing on urban life-course approaches in response to environmental change, bridging the gap between research and practice; iv) promote integration of public health research and practice into urban research and data collection agendas, to address UN Sustainable Development Goal 11: Make cities inclusive, safe, resilient and sustainable. These objectives address ISUH goals and ICUH themes on health equity and healthy sustainable urbanization.

The following two main themes will be discussed in this workshop:
1. Research & innovation: Explore links and interactions between urban health, ecological public health, climate change, air quality and sustainable development, with specific examples for integrated life-course solutions.
2. Achieving impact: Going beyond established public and policy engagement and dissemination to the more comprehensive exploration of challenges and opportunities with agents from the public and private sectors.

This workshop targets public health practitioners, urban planners and developers, environmental scientists, air quality managers, exposure scientists, epidemiologist, toxicologists, city directors.

ORGANIZERS

Sotiris Vardoulakis, Director of Research, Institute of Occupational Medicine, and Co-Chair of Healthy-Polis International Consortium for Urban Environmental Health & Sustainability

Thomas Krafft, Faculty of Health, Medicine and Life Sciences, School for Public Health and Primary Care, Maastricht University, and Co-Chair of IGU Commission on Health and the Environment

SPEAKERS

Franz Gatzweiler, ICSU Program on Health and Wellbeing; Alena Bartonova, Research Director, NILU, UAE; Lidia Morawska, Director, International Laboratory for Air Quality and Health, Queensland University of Technology, Australia; Silvana Di Sabatino, University of Bologna, Italy; Clare Heaviside, Public Health England, UK; Daniel Black, db+a, UK

Other Healthy-Polis scientific advisory committee members, particularly those aiming to develop specific collaborative research proposals for funding
The main purpose of this workshop is to explore how the framework and methods developed under the EURO-HEALTHY project can effectively assist local policy-makers in the analysis, evaluation and selection of policies aiming to promote health equity in different urban settings. Furthermore, it is expected that the workshop will lead the participants to exchange knowledge on: i) Health equity issues in different cities and the impact of local policies on intra-urban health inequalities; ii) Good practices on urban policies improving population health and decreasing inequalities; iii) Stakeholder involvement; iv) Evidence on how greater collaboration among researchers, stakeholders, policy-makers and civil society representatives complements the efforts to integrate research into policies and improve health equity.

The workshop will be structured in two parts. The first part will include a number of presentation sessions regarding the development of the EURO-HEALTHY's case studies of Lisbon and Turin and the methodology implemented to support the evaluation and selection of policies in each city. The second part will be focused on discussing the added-value, the opportunities and challenges of the transferability of the EURO-HEALTHY's framework, tools and approaches to other urban settings and its complementarity with other socio-ecological frameworks.

This workshop will provide a unique platform for policy makers, city councillors, health geographers, urban planners and health scientists to discuss determinants of health equity, public policies, evidence-based policy-making, evaluation methods, stakeholders involvement, healthy urban planning.

ORGANIZERS

Paula Santana, University of Coimbra, EURO-HEALTHY Project Leader
Ann Uustalu, European Commission Directorate General for Research & Innovation (DG RTD)

PART 1 – Evaluation of policies in the EURO-HEALTHY case studies of Lisbon and Turin
Chair: Arlindo Phillippi, University of São Paulo
Moderator: Thomas Krafft, Maastricht University
Speakers: Paula Santana, University of Coimbra, EURO-HEALTHY; Paulo Correia, University of Lisbon, EURO-HEALTHY; Angela Freitas, University of Coimbra, EURO-HEALTHY; Giuseppe Costa, Regional Epidemiology Unit of Turin, ASL TO3, EURO-HEALTHY
Panel discussion: Arpana Verma, University of Manchester; Ana Diez Roux, Drexel University, USA; Waleska Caiaffa, Federal University of Minas Gerais School of Medicine, Brasil; Franz Gatzweiler, ICSU, Chinese Academy of Sciences; João Afonso, City Councillor, Lisbon Municipality

PART 2 – Moving evidence to action: learning lessons and knowledge transfer
Chair: Ann Uustalu, European Commission (DG RTD)
Moderator: Gerard Salem, University of Paris Ouest
Speakers: Birgit Boissezon, Head of Unit of Sustainable Management of Natural Resources in the European Commission (DG RTD); Matthias Braubach, Officer, WHO European Centre for Environment and Health; Jason Corburn, University of California at Berkeley, USA

Plenary Session: 16:00 - 18:00
Panel discussion: Marcus Grant, Advisor to WHO Healthy Cities Programme, Director of SHINE, Bristol Health Partners, UK; Mark Rosenberg, Queen's University, Canada; Lucas Surel, Acsantis, Paris

Plenary Session: 16:00 - 18:00
The population of Africa is predicted to double over the next 40 years, driving exceptionally high urban expansion rates. These expected urban expansion rates will induce major changes in human population distribution, with important consequences on the environment, health and socio-economic development. The MAUPP project (Modelling and forecasting African Urban Population Patterns for vulnerability and health assessments) is a 4-year research project focusing on the development of data and methods for monitoring urban African settings and modelling population distribution. Satellite remote sensing offers an effective solution for mapping settlements, monitoring urbanization at different spatial and temporal scales and predict intra-urban variations in population density.

The quantity and quality of human population datasets available for sub-Saharan African cities remains very poor, and our objective is first to demonstrate the potentialities of newly developed data and methods in the field of urban population mapping and modelling for urban health decision making. Our broader objective is to meet potential users of our datasets in order to better design them to user needs and understand user learning requirements to inform our capacity building activities.

- Brief presentation of the MAUPP project (Catherine Linard)
- Presentation of the available datasets (Michal Shimoni & Eléonore Wolff)
- Best practices for using the datasets and example applications (Jessica Steele & Catherine Linard)
- Discussion with participants on (i) the utility of datasets in their own field of expertise, (ii) data limitations and (iii) specific requirements for urban health applications

ORGANIZERS

Catherine Linard, Spatial Epidemiology Lab (SpELL), Université Libre de Bruxelles, Brussels, Belgium; linard.catherine@gmail.com

Michal Shimoni, Signal and Image Centre (SIC-RMA), Belgian Royal Military Academy, Brussels, Belgium; mshimoni@elec.rma.ac.be

Sabine Vanhuysse, Geospatial Analysis (ANAGEO), Université Libre de Bruxelles, Brussels, Belgium; svhuysse@ulb.ac.be

Jessica Steele, WorldPop, Geography & Environment, University of Southampton, Southampton, UK; steele.jessica@gmail.com

SPONSORS

This workshop is supported by funding from the Belgian Science Policy (SR/00/304).

**LOCATION:** University of Coimbra<br>Humanities Faculty
The objective of this workshop is to gather expert insight on how the inclusive healthy placemaking definition and framework could be improved and made more useful to practitioners and researchers; to explore the overlapping and complementary aspects between design/urban planning and public health research and practices, particularly related to equity; and to inspire participants to apply these early learnings to their own practices and research.

We will introduce the working definition of inclusive healthy placemaking as well as the research and practice evaluation framework, two products that resulted from multi-method research which included literature review of design, planning, placemaking, equity, and social inclusion, as well as qualitative interviews with placemakers from around the world.

Participants will visit Praça da República and Garden of Sereia to test our assumptions. We will receive an overview about the space from two local practitioners. We will then conduct an exercise based emerging indicators in our framework for inclusion, health, and placemaking. We will then return to the university, where we will have a facilitated conversation and another exercise that applies our collective knowledge on how we can best evaluate community supports and other external factors that underpin a healthy and inclusive place.

By the end of the workshop, participants will have had the opportunity to view a public space in a wholly new way. They will walk away with a common understanding of the elements and indicators of inclusive healthy placemaking and the pathways to changing practice.

This workshop is suited for public health, design and planning researchers, and practitioners interested in the role the public realm plays in supporting health outcomes, particularly with a focus on social justice and equity.

PCW 5 HOW TO IMPLEMENT AND SCALE UP COMMUNITY BEST SOLUTIONS FOR IMPROVING URBAN HEALTH

The objectives of the pre-conference workshop are to share different best solutions on community-based urban health interventions and create a global learning and information sharing network on community best practice to be affiliated with the ISUH. A ‘horizontal learning approach’ will be proposed to showcase the benefits of evidence-based practices so other countries may benefit by replicating the best practices, as adapted to their local conditions. The network will promote learning and action among members in their own cities and countries and identify opportunities to intervene in global, regional and national urban health policy. Responsibilities and resource mobilization for the thematic network will be defined.

Among the topics to be discussed by panellists in active dialogue with all workshop attendees include: Indicators and targets for measuring community best practices within the SDGs goals; how to engage and scale up the community best solutions; how to share the best solution knowledge among the partners and stakeholders; mobilizing local resources for community best solutions. Participation by NGOs, UN Agencies, academicians, students, managers, policy makers and funding organizations with track record of implementing successful community-based practice are encouraged.

The workshop will feature a combination of panel discussion, small group work and plenary session to bring together the elements of an action plan.

ORGANIZERS

Speaker:
Shiv Kumar, Founder and Chief Mentor, Swasti, India
Noor Mohammad, Executive Director, PSTC, Bangladesh
Knowing the best way of structuring your paper when writing it, and the most appropriate journal to send it to, really helps in getting your paper accepted. Also understanding how editors and publishers think and what they expect, and knowing how the peer review process works, is invaluable insight into the publishing process.

After attending this workshop, one in the Elsevier Publishing Connect Workshop series, participants will have a clear idea of the steps needed to be taken before starting to write a paper. They will also be able to plan writing manuscripts using the logical step sequence – not the sequence in which the paper will be read. Authors are also made aware of what aspects of their papers Editors and Publishers look at critically, and to ensure that in taking care of these areas, their papers are much more likely to be accepted. Dealing with referees’ comments and the art of polite rebuttal are also described such that these can be used to improve the submitted paper suitably. Sensitive areas such as publishing ethics, plagiarism, duplicate publishing, etc are also clearly explained such that participants have a clear understanding of what is allowed, and what is not permitted.

These insights into the publishing process will enable the participants to be more confident as an author in the world of science publishing, and will help them get their papers published more easily.

Keywords: Publishing, Paper authorship, ethics, journal.

The target audience of this workshop are early career researchers.

ORGANIZERS
Deirdre Dunne, Environmental Sciences Department, Elsevier, Amsterdam, The Netherlands
The ISUH is committed to supporting and shaping urban health education around the world. This pre-conference workshop will build on previous global dialogues and ICUH sessions. The results of a global survey conducted by the International Society for Urban Health (ISUH) Working Group on Education and Training to gather models for urban health education will be presented.

This workshop will discuss the training needs for promoting urban health equity. We will hear from participants and invited guests on how to organize new training in urban health equity in university settings, define core competencies, and engage city decision-makers and NGOs to move from education to practice.

At the end of the session, participants will:

(a) have an understanding of current university-level urban health training programmes;

(b) discuss and co-design the core competencies for a global urban health training programme; and

(c) shape the work plan for the ISUH Working Group on Education and Training for 2018.

The workshop is open to academics, NGO leaders, government officials and others from disciplines including public health, urban planning, medicine, geography, design and others.

INTEGRATING WORK ON THE SDGS AND THE NEW URBAN AGENDA TO IMPROVE HEALTH EQUITY IN CITIES

The United Nations Sustainable Development Goals and New Urban Agenda provide goals and frameworks for countries and regions to achieve higher levels of economic and social development. Cities and the pace of urbanization worldwide make the need for integrated planning and implementation of interventions to achieve these goals critical. The commitment that "no one be left behind" reinforces the importance of health equity as a cross-cutting theme in urban settings.

**PS1.1**  
**PRE-FORMED PANEL**  
Growing old in urban slums: challenges to the health of older people living in informal settlements  

**Room:** Main Auditorium  
**Chair:** Megumi Rosenberg, Technical Officer, WHO Centre for Health Development

This panel will address the dynamics of ageing and health in urban informal settlements. Addressing this aspect of the urban reality is critical for the pursuit of key interlocking global development agendas: the Sustainable Development Goals, the New Urban Agenda and the Global Strategy and Action Plan on Ageing and Health. Expert panellists from Africa, South Asia and Latin America, where the world’s largest slum areas are found, will share evidence and insights on key challenges and opportunities for optimizing the health of those who are old, or growing old, in urban slums.

**SPEAKERS**

- **Isabella Aboderin,** Head, Aging and Development Program, African Population and Health Research Centre
- **Waleska Caiaffa,** Professor, Federal University of Minas Gerais & Belo Horizonte Observatory for Urban Health
- **Abdur Razzaque,** Emeritus Scientist, icddr,b
- **Discussant**
- **John Beard,** Director, WHO Department of Ageing and Life Course
Implementation research can serve to advance how urban health issues are addressed, particularly considering the multi-sectoral nature of many of the challenges. The panel participants represent a Regional Ministerial Governing Body, donor, civil society, and research institutions. Panelists will present on evidence needs, gaps and opportunities born out of a multi-stakeholder consultation focused on nutrition, and water, sanitation and hygiene (WASH) interventions to meet the needs of the poorest children residing in urban areas of East Africa. Panelists will discuss determinants of urban health challenges, review the relevant evidence, share stakeholder perspectives and propose a set of implementation science priorities to advance the health of children in urban areas.

This session will draw on recent research to demonstrate the higher WASH-related health risk associated with high-density urban areas, as well as the unique risks and exposure pathways characteristic of such environments. It will also explore a number of potential avenues for addressing these challenges, including the issue of demand-creation for WASH services among informal settlements, understanding the determinants of behaviour in complex urban environments, and the opportunities and barriers associated with the model of decentralised services.

**SPEAKERS**

**Robert Dreibelbis**, LSHTM – Challenges and opportunities for WASH behaviour change in urban and informal settlements

**David Berendes**, Georgia Institute of Technology – Exploring health impacts of decentralised sanitation systems

**Jane Mumma**, Great Lakes University of Kisumu, Kenya – Unique risks and pathways in peri-urban environments

**Roma Chilengi**, Centre for Infectious Disease Research, Zambia – Increasing sanitation demand as one key element for successful interventions
Gender differentials in prevalence of Non communicable disease multimorbidity and associated health care utilization and expenditures in selected BRICS countries: cross-sectional study
A. Pal (1).

Coffee break: 10:10 - 10:40
PS2.3 PRE-FORMED PANEL
What makes places more conducive to achieving a culture of health?

Room: Aeminium C1A2
Chair: Sharon Roerty, Senior Program Officer RWJF

In this panel, Gehl Institute will first introduce an evaluation framework for inclusive, healthy placemaking to the audience and describe some of the key elements gathered from literature and global scan of practice. We will then hear from practitioners working on the ground in cities around the world about their successes and challenges in creating public spaces for improved health and equity, either in close collaboration with municipalities or through a public campaign. Through the discussion, we will test the strength of the emerging framework and surface key actions practitioners, researchers, decision-makers, and other stakeholders could take to contribute to the cross-sectoral effort that inclusive, healthy placemaking requires.

SPEAKERS

Sharon Roerty, Senior Program Officer RWJF

Jennifer Gardner, Program Manager, Gehl Institute

Louise Kielgast, Associate, Gehl practice

Jorge Canez aka Peatonito, pedestrian activist, founder of Pedestrian Action League, Mexico City

Coffee break: 10:10 - 10:40
PS2.4 Healthy urban planning, measurement and metrics, data and research
Climate & Health II

Room: Aeminium C1A4
Chair: Sotiris Vardoulakis, Institute of Occupational Medicine (IOM), UK

Coffee break: 10:10 - 10:40
UNDERSTANDING AND ADDRESSING DEMOGRAPHIC,
EPIDEMIOLOGICAL AND SOCIETAL CHANGES

Room: Main Auditorium

This session will explore the global trends of recent epidemiological, demographic, and societal changes and the opportunities and challenges they present for policies and programs that can achieve the highest levels of health for people living in cities.

CHAIR
Yonette Thomas
Scientific Advisor on Urban Health, The New York Academy of Medicine; Senior Research Advisor, American Association of Geographers, USA

PANELLISTS
Alex Ezeh
Executive Director of the African Population and Health Research Centre, Kenya

Richard Wilkinson
Co-founder of The Equality Trust, Professor Emeritus of Social Epidemiology, University of Nottingham Medical School, UK

John Beard
Director of the Department of Ageing and Life Course, World Health Organization, Switzerland

K. Srinath Reddy
President of The Public Health Foundation of India, New Delhi, India
1 The impact of constructivism density of the urban tissue in improving the physical urban ambience of the free space - the street- for Saharian cities. The study of the case city of Biskra
R. Qaoud, Architctuer, Algeria

2 Kernel density estimation of a gravity-based healthcare accessibility model
F. de Mello-Sampayo, University Institute of Lisbon, Portugal

3 Spatial heterogeneity in the effects of quality on elderly’s medicare spending

O. Marquet, North Carolina State University, USA
61 Women's action towards managing health impacts of climate change affecting urban poor in south Asia
M.L.P. Elliott, Georgia Institute of Technology, USA

62 Food insecurity and multi-morbidity among older adults: A study of urban cities from six LMICS using SAGE data
M. Chaudhary, Tata Institute of Social Sciences, India

63 The consideration of intersectoral perspectives regarding the relationship of subsidized housing and health and well-being: An experiential analysis in Medellin, Colombia
R.V.H. Dover, University of Antioquia, Colombia

64 Are neighbourhood socioeconomic characteristics associated with depressive and anxiety symptoms over time? An investigation of longitudinal data among older adults in the Netherlands
I. Motoc, VU University Medical Center; Amsterdam Public Health Research Institute, The Netherlands

65 There's no place like a home -- solving the homeless crisis in the U.S.
N.A. Shipley, University of La Verne USA

66 Socioeconomic vulnerability, health situation analysis and indicators: A preliminary Analysis of Millennium Development Objectives (ODM) for the municipality of Sao Paulo
M. Miranda, University of Sao Paulo, Brazil
PS3.1 PRE-FORMED PANEL
Measuring age-friendliness and the liveability of cities for ageing populations

Room: Main Auditorium
Chair: John Beard, Director, WHO Department of Ageing and Life Course

This panel will illustrate different approaches to evaluating Age-friendly City (AFC) initiatives. It will present available tools, including the WHO core indicators of age-friendliness, a process-oriented evaluation tool developed in the UK, and the AARP liveability indicators. It will also showcase Age-friendly City assessments from around the world, including a pilot study of the WHO core indicators in Washington, DC; New York City’s new effort to develop an interactive map of ageing-related data to facilitate more informed planning and equitable deployment of resources; a large-scale mixed-methods evaluation by Age-friendly Quebec; and an assessment of community liveability in Shanghai.

DISCUSSANTS/SPEAKERS

Megumi Rosenberg, Technical Officer, WHO Centre for Health Development

Stefanie Buckner, Research Associate, Cambridge Institute of Public Health

Peter Schafer, Acting Director, Center for Health Policy and Programs, New York Academy of Medicine

Xiaocang Ding, President, Jing’an Preventive Medicine Association, I KNOW Elder Health Management and Service Centre, Shanghai
**WED 27/09  14:00 - 15:30 PARALLEL SESSION (ABSTRACTS)**

(1) Agència de Salut Pública de Barcelona (ASPB) Italy, (2) GESP Italy, (3) The New York Academy of Medicine USA, (4) University of Pavia Italy

**Coffee break: 15:30 – 16:00**
The session will examine the gaps that need to be addressed in low- and middle-income countries (LMICs), with respects to surveillance and data-driven decision making for urban planning and public health; digital innovations that are leapfrogging urban wellbeing; financial and sustainability challenges; and highlight case examples of how technology is transforming urban health, including non-communicable diseases that disproportionately affect LMICs. The existing and emerging urban health challenges are complex and cannot be addressed by one academic discipline or the governmental sector alone. There is an urgent need for multidisciplinary and multisector approaches to make cities inclusive, safe, resilient and sustainable.

SPEAKERS

John Rossant, Chairman, The New Cities Foundation (Canada), “Incubating Local Innovations to Address Urban Health Challenges in LMICs”

Alain Labrique, Associate Professor, John Hopkins School of Public Health (USA), “Leveraging Data and Technology to Address Equity and Access to Health at a Population Level in LMICs”

Colin Machale, General Manager, Health and Life Sciences, Europe Middle East Africa (USA), “Leapfrog Technologies for Health and Development in LMICs”

Coffee break: 15:30 – 16:00
This pre-formed panel will discuss the importance of place in designing, adapting and delivering community-based interventions to prevent or manage disease and promote healthy outcomes. Evidence based public health interventions when translated to diverse urban spaces and/or across international boundaries require modifications in order to make them feasible, linguistically appropriate, effective and relevant to the environmental conditions of the community, even when its aim is fidelity to focus, target population, and content. Presenters will identify and discuss the challenges experienced in delivering evidence based and manualized interventions in diverse urban spaces. The panel is designed to be interactive, encouraging active discussion and exchanges on intervention design, strategies and outcomes from audience participants.

Coffee break: 15:30 – 16:00
Effective local government is essential to creating and implementing more inclusive and effective policies for sustainable urban development and health equity. One of the critical requirements of effective government is the ability to engage the multiple stakeholders within and across sectors of government, organizations of civil society and communities themselves to align their work towards a mode of “governance” to promote health equity across urban populations. The panel will discuss models that work and challenges to successful inclusive governance.

CHAIR

Marcus Grant
Advisor to WHO Healthy Cities Programme; Director of SHINE; Bristol Health Partners, UK

PANELLISTS

Jason Corburn
Associate Professor of City & Regional Planning, University of California at Berkeley, USA

David Grossman
Director of Global Program Management, International City Managers Association, USA

Susan Parnell
Professor of Urban Geography and co-founder of the African Centre for Cities at the University of Cape Town, South Africa

Ricardo Baptista e Leite
City Councillor of Cascais Municipality, Portugal
PS4.1 PRE-FORMED PANEL
The state of the art of urban governance to promote health equity: a follow-up to the 2016 WHO Global Report on Urban Health

Room: Main Auditorium
Chair: Jo Ivey Boufford, President, New York Academy of Medicine

This panel will address the conference theme of “Urban governance and equity-oriented policies”. With its strong focus on equity, it speaks to the core of both the New Urban Agenda and the Sustainable Development Goals. This is a follow-up to the launch of the 2nd WHO Global Report on Urban Health at last year’s ICUH. The expert panellists, who contributed to the Global Report, will discuss various aspects of urban governance, from effective governance strategies to monitoring and benchmarking, with a view toward advancing research and practice concerning urban governance strategies that have demonstrable impact on health equity.

DISCUSSANTS/SPEAKERS

Megumi Rosenberg, Technical Officer, WHO Centre for Health Development

Jason Corburn, Professor, University of California Berkeley & Director, Institute of Urban & Regional Development, Center for Global Healthy Cities

Tolu Oni, Senior Research Medical Officer, Institute of Infectious Disease and Molecular Medicine, University of Cape Town

José Siri, Research Fellow in Urban Health, United Nations University International Institute for Global Health

Billie Giles-Corti, Distinguished Professor & Director, Urban Futures Enabling Capability Platform, RMIT University
LAC is unique in having attained a high level of urbanization (~80%) far more quickly and with less resources than other highly-developed regions. LAC thus faces unique urban health challenges, and has responded with transformative innovation. The LAC-Urban Health research network aims to build new linkages among LAC researchers and with global knowledge and policy networks; to better understand how urban policies affect urban health; to promote increased research funding; and to derive lessons of value to other regions facing rapid urbanization. This panel features researchers from LAC-Urban Health to report on new initiatives and findings from the region.

**SPEAKERS**

**Ana Diez Roux**, Drexel University Dornsife School of Public Health: *A major new Wellcome Trust-funded urban health research initiative in Latin America*

**Martha Barata**, Instituto Oswaldo Cruz: *Managing Climate Change Threats to Human Health in Cities - case study of the city of Rio de Janeiro*

**Thiago Hérick de Sá**, World Health Organization: *Enabling the health sector to lead the urban transformation*

**Eliana Martinez Herrera**, Universidad de Antioquía: *Moving beyond the concept into the metrics: a technical perspective from building community and political decision for enhancing healthy citizen capacities in Medellín 2012 -2015.*

**Anne-Dorotheé Slovic**, Universidade de São Paulo: *Assessing local understanding of the health effects of air pollution exposure while commuting to work: a São Paulo survey*
With the global labour force set to increase to 3.5 billion by 2030, there is an unprecedented opportunity to harness the transformative power of workplaces as an effective setting to prevent and manage NCDs. The session will highlight relevant approaches to catalyse efforts by employers, local authorities, and national governments worldwide to promote and protect the health of their workforces, presenting evidence, potential solutions, and concrete examples of good practice. Panellists will explore the significance of workplace wellness within the post-2015 development agenda, define the investment case for implementing workplace wellness initiatives, and demonstrate the essential nature of a cross-sectoral approach.

**SPEAKERS**

Scaling for impact: A critical look at how low-cost innovations are creating healthier and resilient cities

Room: Main Auditorium
Chair: Gerald Bloom, Co-Convener Health and Nutrition Cluster, Institute of Development Studies, UK

The United Nation projects the increase of urban populations from 3.3 to 4.9 billion worldwide by 2030. Much of that growth is slated to occur in cities of the developing world. This has huge implications on how established and new cities in these countries manage and plan for the health of their populations. New models of urban healthcare increasingly involve low-cost, high-quality socially linked interventions enabling diverse populations to better access and utilise health services. This panel discussion will critically examine the evolution and approaches of urban health innovation eco-systems across 3 focus areas. Panellists will draw on their different experiences with implementing and/or analysing interventions aimed at enabling pro-poor innovations to diffuse at scale in increasingly diverse and complicated health networks.

SPEAKERS

Priya Balasubramaniam, Senior Public Health Scientist, Public Health Foundation of India

Audrey Chia, Associate Professor & Director Healthcare Leadership Programme, Business School, National University Singapore

Kristian Olsen, Medical Director, Consortia for Affordable Technologies (CAMTech), Harvard Medical School
Increasingly, migration patterns and policies shape urban health not only among migrants, but in their origins and destinations. Urban planning and development policies that consider migrants can lead to broad individual and societal benefits. Policies that exclude or ignore them may severely impact individual physical and mental health and the economic functioning, social integration, social trust and resilience of host and sending communities. Such policies may also widen equity gaps, further affecting health and wellbeing. In this panel, researchers from UNU-IIGH and IOM will explore connections among cities, health, and migration using case studies, policy analysis, and systems thinking frameworks.

**SPEAKERS**

**Nicola Pocock**, UNU-IIGH  
Defining linkages between migration, urban health, and equity

**Davide Mosca**, IOM  
Migration, health and urbanization: interrelated challenges

**Bavo Stevens**, UNU-GCM  
The role of UNHCR and NGOs in shaping the well-being of refugees and asylum seekers in Bangkok, Thailand

**José Siri**, UNU-IIGH  
Systems thinking to catalyze multi-sectoral urban partnerships on migrant health
Airports are seen as forms of urban agglomerations: aerotropoleis. The development of a second international airport in Sydney (Australia) creates an opportunity to consider health making dimensions of such settings. Health scholars and practitioners aim to set a global benchmark for ‘Healthy Aerotropoleis’.

In this panel we will present the outcomes of a Healthy Airport Health Impact Assessment, Healthy Airport Region modeling and validation, and an assessment of an airport-dwelling community. Our conceptual progress toward this new ‘Healthy Setting’ merits discussion and feedback with global urban health colleagues.

SPEAKERS

Evelyne de Leeuw, Centre for Health Equity Training, Research and Evaluation CHETRE, University of New South Wales Sydney, South Western Sydney

Alana Crimeen, Centre for Health Equity Training, Research and Evaluation CHETRE, University of New South Wales Sydney, South Western Sydney

Stephen Conaty, South Western Sydney Local Health District, Division of Population Health
PS5.4 Environmental Health and Urban Sustainability
Walkability and the built environment

Room: Aeminium C1A4
Chair: David Vale, University of Lisbon, Portugal

Understanding walkability among young educated Saudi women: a qualitative investigation

(1) McMaster University Canada, (2) St. Michael's Hospital Canada, (3) Dalla Lana School of
Public Health Canada, (4) Institute of Mental Health Singapore

Health in housing policies in the Western Cape Province of South Africa:
an investigation of housing policies to address infectious and non-
communicable disease epidemics
A. Weimann (1), W. Smit (1), N. Kabane (2), T. Jooste (2), A. Hawkridge (2), T. Oni (1)
(1) University of Cape Town South Africa, (2) Western Cape Government South Africa

Break: 9:00 - 9:10
Practitioners, policy makers and research all work towards understanding the dynamics needed and the roles that community and other stakeholders should play when identifying, designing, or upgrading public spaces that support healthy and inclusive communities. The Robert Wood Johnson Foundation seeks to better understand how to achieve inclusive, healthy placemaking (a people-centered approach to the planning, design, and management of public spaces) by learning from global approaches that can then be applied to the United States. The purpose of this panel is to present examples of approaches to healthy placemaking from different regions of the world and share learnings among the panelists and with the audience about the opportunities and challenges of creating public spaces that promote people’s health, happiness, well-being, and community cohesiveness. Moderated by Susan Roerty of the RWJF, four panelists who are active in the general area of inclusive, healthy placemaking will discuss their projects and/or research.

**SPEAKERS**

**Syed Ayub Qutob**
Urban Open Spaces for Adolescent Girls: An Assessment for Islamabad and Rawalpindi, Pakistan

**Fred Kent**, Founder and President, Project for Public Spaces, New York, USA  
Whom does design really serve? A comparison between two different parks in Canada

**Ana Maria Sperândio**, Professor, University of Campinas, Brazil  
Urban Resilience: The Community and Public Strength to Promote Healthy Urban Space
HIV and cancer represent two global disease burdens – one infectious, one non-communicable. Both diseases are chronic in nature and pose challenges to sustained health care, further augmented by high urban population densities. Urban environments are associated with increased exposure to risk factors for cancer, while a tailored response in cities is also essential to end AIDS as a public health threat by 2030. The New Urban Agenda and the Sustainable Development Goals mandate collaborative action across health specialties and across the whole of society as the central means through which health may be protected and promoted in urban settings.

SPEAKERS

K Srinath Reddy, President, Public Health Foundation of India

José M Zuniga, President, IAPAC & UNAIDS Special Advisor on Fast-Track Cities

Rebecca Morton-Doherty, Head, Engagement & Impact, C/Can 2025: City Cancer Challenge

Jorge Sampaio, Honorary Chair, Lisbon Fast-Track Cities Committee, and former President of Portugal

Roberta Bosurgi, Head of Urban Health Initiative, Novartis Foundation (Switzerland)
Unlocking the Potential of Community-Driven Public/Private Partnerships (PPPs) to Reduce Harmful Alcohol Use

In December 2015, AB InBev announced the Global Smart Drinking Goals (GSDG), its commitment to meaningfully contribute to the reduction of harmful alcohol use over the next decade. One of the stated goals is to reduce harmful alcohol use by at least 10% in nine cities. This panel will bring together leadership from the AB InBev Foundation, the GSDG Technical Advisory Group, and a public-private partnership in one of the nine cities [Brasilia, Brazil or Leuven, Belgium] to describe their journey towards achieving this ambitious set of goals. Emerging ideas in the architecture, as well as models for strong governance, program planning and implementation, and measurement & evaluation will be explored.

DISCUSSANTS/SPEAKERS

Westley Clark, Former Director, Center for Substance Abuse and Treatment (CSAT), U.S. Substance Abuse and Mental Health Services Administration (SAMHSA) Department of Health & Human Services (HHS), Chair, GSDG Technical Advisory Group

Leonardo Moreira, Steering Committee Member, GSDG City Pilot in Brasilia, Brazil

Scott Ratzan, President, AB InBev Foundation

(1) Glasgow School of Art UK, (2) University of Edinburgh UK, (3) University of Virginia USA, (4) Heriot-Watt University UK, (5) James Hutton Institute UK

Coffee break: 10:10 - 10:40
There is increasing understanding of the importance of evidence based decision making in urban planning and management. For those seeking to advance a health agenda, evidence on the health impact of decisions in all sectors are significant. Critical challenges in creating the needed evidence include the systems to collect data, data quality and availability, and how it can best be used by public managers, policy makers and communities themselves to set realistic metrics for measuring progress towards a healthier and more equitable urban environment. Partnerships between academia and government can offer advantages in achieving a holistic understanding of health determinants and the skills needed to address them.

84 Quantifying the social costs of health impacts from urban housing developments
E. Eaton, University of Bath, UK

85 Effectiveness of community-based management of acute child malnutrition in urban informal settlements of Mumbai, India: A cohort study
A. Jayaraman, Society for Nutrition, Education & Health Action, India

86 A method for the environmental and financial cost assessment of hospital buildings in the early design stage
M. Stevanovic, KU Leuven Belgium; VK Studio Architects, Planners & Designers, Belgium

87 Urban sprawl and mortalities related to physical inactivity in a Brazilian metropolitan area
L.V. Barrozo, University of São Paulo, Brazil

88 The health of high density housing policy in Australia
S. Foster, RMIT University Australia; University of Western, Australia

89 Assessing of atmospheric pollutants dispersion impacts under REMEDIO Project
T. Faria, University of Lisboa, Portugal

THU
28/09   12:10 - 13:10 POSTER SESSION 2

90 Challenges and outputs for practice of healthy urban planning of academic and professional training programmes
N. Lemaire, EHESP School of Public Health, France

91 LIFE Index-Air project: Development of an integrated exposure - dose management tool for reduction of particulate matter in air
T. Faria, Instituto Superior Técnico, Portugal

92 The association between the geographic distribution of the obesity prevalence in the Vila Nova de Gaia scholar population, the Index of Sociomaterial Deprivation, and the existence of sports or leisure facilities
B. Camarinha, Vila Nova de Gaia Municipality, Portugal

93 Rasch analysis of an urban health measure constructed from the Urban HEART matrix
E. Martinez, University of Antioquia, Colombia

94 The shape of the city and the implications for public health
M. Amado, University of Lisboa, Portugal

95 Water and sanitation infrastructure as an essential component of urban planning to mitigate health risks
A. Silva, Faculty of Sciences and Technology, Portugal

96 Green roofs technology as a solution for promotion of urban health
M. Moghbel, University of Tehran, Iran

97 Climate variability and respiratory admissions in São Paulo city from 2003 to 2013
S.L. Moraes, University Of São Paulo, Brazil

98 Urban neighbourhood equality in terms of walkability index; a pilot study on two environmental area of Rome/Italy
R. Rafiemanzelat, Sapienza University of Rome, Italy

99 Aging-in-place: Obstacles and opportunities
D.S. Albuquerque, University of Brasilia, Brazil

100 Qualifying information on the deaths and serious injuries caused by road traffic in five Brazilian capitals using record linkage
P.M.P. Mandacaru, Goiás Department of Health Brazil; Municipal Health Department of Goiânia, Brazil

101 Comparison of Mid-upper arm circumference (MUAC) versus weight-for-height for screening of moderate and severe acute malnutrition in children aged 6-36 months in informal settlements of Mumbai, India
A. Jayaraman, Society for Nutrition, Education and Health Action, India

102 The relationship between potable water quality and the public health of the urban communities: The case of Inharrime Village, Inhambane Province - Mozambique
U. Hassamo, University of Pedagogica, Mozambique

103 The relationship between walkability and health outcomes in Lisbon Metropolitan Area
M.F. Pereira, University of Lisbon, Portugal

104 Constructivist Model for measuring quality of Physiotherapy services from a manager’s perspective
P. Mandelli, Federal University of Santa Catarina, Brazil

105 Prioritizing urban maternal, newborn and child health in high focused states of Madhya Pradesh and Odisha, India
B. Patil, MCSP - USAID, India

106 Willingness-to-pay for designing respiratory healthy city: Based on a survey of Shanghai
L. Wang, Tongji University, China

107 What does “urban” stand for in the Brazilian context? A study investigating the effects of income inequality and neighbourhood deprivation on the association between urban and rural living, and self-rated health
N. Vincens, Lund University, Sweden

108 Determinants of health in urban slum and non-slum areas: Findings from baseline study in Madhya Pradesh, India
B. Patil, MCSP-USAID, India

109 Viral suppression among HIV positive patients on treatment in rural HIV clinics, South-Eastern Nigeria: A gender-based perspective
P.O. Anyanwu, Excellence Community Education Welfare Scheme, Nigeria

110 Improving quality of care for HIV positive men on treatment in South-East Nigeria using data feedback to clinicians
P.O. Anyanwu, Excellence Community Education Welfare Scheme, Nigeria

111 Type 2 diabetes and area-based socioeconomic index in Zhejiang, China: A spatial analysis
X. Zhang, Acon Primary Care Research Center China; Zhejiang Provincial Center for Disease Control and Prevention, China

112 Stimulating community support to address gender-based violence as major driver of HIV in South-Eastern Nigeria
P.O. Anyanwu, Excellence Community Education Welfare Scheme, Nigeria

113 Changes in trends in the supply and demand of health infrastructure in Colombia  
M. Madroñal, University Pontificia Bolivariana, Colombia

114 Community based approach to improve early detection and monitoring for diabetes and hypertension among an urban slum population  
A. Dyalchand, Institute of Health Management Pachod, India

115 Equity in the use of health services in Germany and Spain before and during economic crisis  
L. Lostao, Public University of Navarra, Spain

116 Out-of-pocket expenditure (OOPE) on health care among urban poor living in the slums of Pune city, India  
A. Dyalchand, Institute of Health Management Pachod, India

117 A new day for the midtown-Edmondson community (Baltimore, Maryland, US)  
R. Baylor, Ground Root, Inc, USA

118 A school based intervention programme to improve knowledge and attitude regarding association of arecanut/betel quid and smokeless tobacco with oral lesions and other serious illness among adolescents in Karachi, Pakistan: A Cluster Randomized trial  
S. Rozi, Aga Khan University, Pakistan

119 A cartographic approach to analysing Granulomatosis with Polyangiitis mortality in urban and rural municipalities  
F. Escobar, University of Alcalá, Spain

120 Spatial pattern of visceral leishmaniasis in Araçatuba and in Presidente Prudente – SP, Brazil: On the borders of the cities  
R.B. Guimarães, São Paulo State University, Brazil

121 Health gym stations program: A public policy for urban quality of life  
L. Dobbert, IFSP Brazil; ESALQ-USP, Brazil

122 A prospective investigation of liquor store availability around home and school and alcohol use in adolescents  
G.S.A. Trapp, Telethon Kids Institute Australia; The University of Western Australia, Australia

123 Urban green space interventions deliver benefits for health and equity  
M. Braubach, WHO Regional Office for Europe, Denmark

124 Compact and non-stop cities: What do they do to urban health?  
D.H. Kim, Seoul National University, Republic of Korea

THU
28/09  12:10 - 13:10  POSTER SESSION 2

125 Understanding differences in the walking and cycling environment between Madrid and Philadelphia
   P. Gullón, University of Alcalá Spain; Health institute Carlos III, Spain

126 Defining households and understanding poverty in urban slums: A qualitative study to inform household survey design in Nepal, Bangladesh and Vietnam
   H. Elsey, University of Leeds, UK

127 Designing a street-based, inexpensive and comfort-based walkability index
   T. Al Shammas, University of Alcalá, Spain

128 Deployment of public facilities with healthy city strategy
   M.L. Silva, Unicamp, Brazil

129 Building a healthy campus: Essay at Faculdade Jaguariuna
   A.M. Girotti Sperandio, Faculty of Jaguariuna Brazil; Unicamp, Brazil

130 Judicial intervention in alcohol regulation: An empirical legal analysis
   J. Muhunthan, University of Sydney, Australia

131 Cities and mental health
   O. Gruebner, Humboldt-University Berlin, Germany

132 Applying the healthy urban planning concept in a redevelopment project
   N. Lemaire, EHESP School of Public Health Publique, France

133 The healthy urban living and ageing in place study (HULAP): Exploring the relationship between built environments and the physical activity and sedentary behaviours of older adults in Brazil and the UK
   S. Ferguson, Queen's University Belfast, UK

134 Neighborhood environment walkability scale: A review
   D. Almeida, Federal University of Juiz de Fora, Brazil

135 Neighborhood deprivation assessment-geographical analysis through geo-tagged Instagram posts- case study of enschede -The Netherlands
   Y. Afsharghotli, University of Twente, The Netherlands

136 Healthy urban planning: Health impacts of noise pollution in Coimbra, Portugal
   J. Santos, University of Coimbra, Portugal

ICUH2017 I Health Equity I Coimbra, Portugal I September, 26-29, 2017
#ICUH2017
Although the New Urban Agenda was signed by nations, cities will drive implementation. This creates a critical opportunity to integrate health into urban planning to achieve its goals. Greater collaboration between public health and urban transport and design can help build common language, tools and approaches to protect and promote population health across sectors.

Barcelona is one of Europe’s most densely populated cities and embodies many urban challenges. Using Barcelona as a case study, and drawing on experts from research and policy, this session examines how cities are and can become leaders in bringing health to the forefront of NUA.

SPEAKERS

Cathryn Tonne, Associate Research Professor, Barcelona Institute for Global Health

Helen Colel, Postdoctoral Researcher; Barcelona Lab for Urban Environmental Justice and Sustainability, Universitat Autònoma de Barcelona

Carolyn Daher, Coordinator, Urban Planning, Environmental and Health Initiative, Barcelona Institute for Global Health

Hugo Vásquez, Researcher Housing and Health Research Group, Barcelona Public Health Agency

Access to personal health care services is an important determinant of health. This session will explore models for achieving high quality health care provision and effective health care access in cities. It will also explore the role that health care delivery organizations can play in advancing the health of the communities they serve and assuring health equity.

CHAIR
Mark Rosenberg
Professor of Geography, Queen’s University, Ontario, Canada

PANELLISTS
Pedro Pita Barros
Professor of Economics, Nova University of Lisbon, Portugal (Portugal)

Steffen Nielsen
Director, Cities Changing Diabetes®, Novo Nordisk, Denmark

Easmon Otupiri

THU
28/09 17:10 - 18:40 PARALLEL SESSION

PS8.1 PRE-FORMED PANEL
Understanding the impact of economic crises on the population’s mental health in urban areas

Room: Main Auditorium
Chair: José Miguel Caldas de Almeida, CEDOC, NOVA University of Lisbon, Portugal

The panel includes qualitative and quantitative analyses of the perceived impact of the economic crisis in the Lisbon region, assessed by the general population and primary care users and professionals, followed by analysis of the mental health provision in urban areas during economic crises, using a novel mapping methodology. Patterns of mental health services provision in Barcelona, Bilbao, Helsinki, and Sydney will be analysed, to understand the strengths and the weaknesses of mental health systems. Finally, recommendations to improve quality and a more equitable provision of mental health care in urban areas in times of economic crises will be provided.

SPEAKERS

Ana Antunes, CEDOC, NOVA University of Lisbon, Portugal
Diana Frasquilho, CEDOC, NOVA University of Lisbon, Portugal
Adriana Loureiro, CEGOT, Coimbra University, Portugal
Paula Santana, CEGOT, Coimbra University, Portugal
Luis Salvador-Carulla, University of Sydney, Australia

PS8.2 PRE-FORMED PANEL
Urban environment, health and equity – policy and action

Room: Mondego C2A
Chair: Matthias Braubach, Technical Officer, WHO European Centre for Environment and Health
Sotiris Vardoulakis, Director of Research, Institute of Occupational Medicine, United Kingdom

The session aims to discuss key urban environmental health challenges, the implications of the SDGs and other international commitments for local action, and how local work can be best supported through the provision of data, guidance and tools. Specific focus will be put on the relevance of monitoring urban environments, and how monitoring and impact assessment methods can help integrated and healthy urban planning.

Contributions will be provided by two international organizations involved with the health impacts and surveillance of urban environments (WHO / EEA), and by two researchers presenting their work on the health impacts of urban structures.

SPEAKERS

Theo van Alphen, Researcher, National Institute for Public Health and the Environment, Bilthoven, The Netherlands

Matthias Braubach, Technical Officer Urban and Health Equity, WHO European Centre for Environment and Health, Bonn, Germany

Catherine Ganzleben, Project Manager Environment, health and well-being, European Environment Agency, Copenhagen, Denmark

Natalie Mueller, Researcher, IS Global, Barcelona, Spain

(1) Society for Nutrition, Education and Health Action India
With the growth of secondary and tertiary cities in India, the urban landscape is very dynamic. Private sector partners and donor organizations, as well as the government of India through its formation of the National Urban Health Mission, are responding to this dynamism with varied approaches. Stakeholders are trying to tap into the energy of the markets and growth while addressing continued pressing urban issues, such as slum settlements and environmental constraints. This panel will present some of the varied approaches being tried in India with a discussion of results to date and anticipated impact.

Healthy urban design and ‘slowness’: theory and practice in Brazil and Mexico
L.A. Herzog (1)
(1) San Diego State University USA
The session will discuss the need for and status of developing the indicators, targets and goals for the SDGs for countries to use to monitor progress in achieving urban health. This includes the challenge of priority setting among multiple social determinants such as: women empowerment and education, poverty reduction and access to food and nutrition, urban planning, energy, transportation, housing and information technology, migration and access to universal health services.

The session will also describe the partnership status and way forward for achieving the urban health related indicators and targets of the SDGs. It will consider how the Dhaka Statement for Urban Health can be useful in this process.

225 Education and smoking in Brazil
M. Justus, Center for Social, Urban and Regional Studies, Institute of Economics, University of Campinas, Brazil

226 Engaging experiential youth to address inequalities in educational outcomes for youth in government care in British Columbia, Canada
S. Martin, McCreary Centre Society, Canada

227 Political and Educational Reverberation for Healthy City: experience of medicinal garden in municipal public school
A. Sperândio, University of Campinas, Brazil

Coffee break: 9:30 - 10:00
Built and natural environments are important determinants of health in cities. This session will explore a variety of urban environmental challenges, including air quality, soil and water contamination, traffic congestion, noise, poor housing conditions and the effects of climate change. Strategies for sustainable urbanization must include commitments for action towards achieving healthy urban environments that prevent and protect the population from environmental hazards.

CHAIR

Marian Jacobs
Emeritus Professor of Paediatrics and Child Health, University of Cape Town, South Africa

PANELLISTS

Yongguan Zhu
Professor of Soil Environmental Sciences and Environmental Biology, Chinese Academy of Sciences (CAS); Director General, Institute of Urban Environment, Xiamen, China

Sotiris Vardoulakis
Research Director, Institute of Occupational Medicine, United Kingdom

Lidia Morawska
Director of the International Laboratory for Air Quality and Health (ILAQH), Queensland University of Technology (QUT), Australia

Eugenie Birch
Lawrence C. Nussdorf Professor of Urban Education and Research, University of Pennsylvania, USA; Former Chair of the United Nations Human Settlements Programme’s World Urban Campaign
The Closing ceremony will include reflections on the main conclusions of the conference from the conference hosts and transfer of leadership of the International Society for Urban Health from the current president, Dr. Shamim Talukder to the newly elected president, Dr. Jo Ivey Boufford. The venue for the next conference will be announced.

Paula Santana  
Co-chair of International Conference of Health, ICUH2017, University of Coimbra

José Pedro Paiva  
Dean of Faculty of Arts and Humanities of UC (FLUC)

Fernando de Jesus Regateiro  
Chairman of the Board of Coimbra Hospital and University Centre (CHUC)

José Tereso  
Regional Administration for Health President (ARS-C)

Francisco George  
Directorate of Public Health (DGS)

Jo Ivey Boufford  
President of the New York Academy of Medicine
